

This comment is in reference to the possible loss of WKVE 106.7 to a LPFM station. Despite being limited in output power, WKVE serves a large area in the Triad and Central regions of North Carolina. Their programming is family friendly, and serves the needs of our area in many ways. Their use of translators allows us to hear consistent quality programming in various areas of our state, and throughout the country when we travel. It is highly unlikely that replacing such a network such as K-LOVE with LPFM stations would benefit anyone except the owners of such stations. It would however be a great disservice to us and to many other families that rely on K-LOVE for quality programming to lose access to these translators. Please reconsider your proposal to prioritize LPFM stations over translators such as WKVE.
